Org Topologies™ Consulting Company Accreditation

Master the skills to guide organizations in their agile & digital transformation journeys.

Audience:
- your company's consultants and coaches involved in organizational and strategic client work

Outcomes:
1. have an in-depth understanding of principles and practices of the Org Topologies™ approach
2. have a shared toolkit to address key clients' challenges with the Org Topologies™ approach
3. enrich your company's offering with org assessment and design techniques
4. upskill your coaches/consultants with org design capabilities
5. receive access to a broad set of material on consulting organizational change initiatives

The Org Topologies™ Consulting Companies apply Org Topologies™ to guide organizational change at their clients. Their consultants are Certified Org Topologies™ Practitioners who have expanded and proven their skill set to design, assess and sustain agile ecosystems at scale.

The Org Topologies™ Consulting Organization Accreditation is an in-company education track.

As knowledgeable change agents, Org Topologies™ Practitioners who work in a consultant role have a primary responsibility to influence the change coalitions in the organizational ecosystem. Their horizon of influence transcends the organizational structure and way of working to include leadership, governance, funding, people, culture and engagement.

This will yield in transformation ownership and improved organizational ecosystem that optimizes for business Agility.

Certified Org Topologies™ Consulting Organization (C-OTCO)

The goal of this accreditation level (C-OTCO) is to train and mentor a group of your company's consultants/coaches to become an accredited and reliable partner in guiding organizational change of your clients with the Org Topologies™ body of knowledge.

This program is for a consulting company that is willing to create a dedicated group of coaches/consultants (8 or more people) who are committed to dive into the Org Topologies™.

This accreditation program consists of an educational part based on the Org Topologies™ Practitioner class (OTP) followed by a series of mentorship sessions.
